

What is claimed is:

1. A cartridge for fixing a collector comprising:

a main body (100);

5 a cap (200) fixed to the main body (100); and

a metallic hook (300) inserted and fixed between the main body (100) and the cap (200) when the cap (200) is adhered to the main body (100) by high frequency waves,

10 wherein the metallic hook (300) consists of a hook body (310), inclined elastic flaps (320) (sloped arranged) around the hook body (310) side by side, and horizontal elastic flaps (330) three to four of which are formed between the inclined elastic flaps (320) around the hook body (310).
